APPLIED ARCHAEOLOGY FOR CRM CAREERS,  
ILLINOIS, US  
Course ID: HIST 301KE  
Session I: May 8-June 4, 2022  
Academic Credits: 8 Semester Credit Units (Equivalent to 12 Quarter Units)  
School of Record: Iowa Wesleyan University  

DIRECTORS  
Dr. Jason L. King – Executive Director, Center for American Archeology (king@caa-archeology.org)  

Due to the Covid 19 pandemic, only fully vaccinated students will be allowed to attend this program. Please contact CFS Enrollment Department if you have any questions or concerns.  

PROGRAM DESCRIPTION  
This program is a four-week, intensive field school experience designed to provide students with job-ready skills to enter the workforce as archaeological field technicians at the Cultural Resource Management (CRM) industry. Students will learn key skills necessary for CRM jobs, including survey, surface collection, shovel testing, excavation, laboratory techniques, relevant laws, and reporting. Students will learn the entire process of CRM practices, from data collection to data reporting and mitigation. Practical field and laboratory activities are supplemented by relevant readings and formal lectures.
COURSE OBJECTIVES

The objective of this program is to prepare students to enter the archaeological workforce in field technician positions in public and private CRM crews. This objective is accomplished by providing students with (1) practical experience in field and laboratory methods necessary for detecting and documenting archaeological sites, (2) instruction in the legal and consultation requirements of cultural resource management, and (3) experience in reporting of archaeological fieldwork.

Students will engage in surface survey, shovel testing, and excavation at archaeological sites in the Lower Illinois River valley, documenting their fieldwork in preparation for interpretation and reporting. Students also participate in the cleaning, tabulation, and curation of archaeological material collected during their field experiences.

LEARNT SKILLS

We are aware that many students may not seek academic careers but will pursue employment in the private sector. To that end, we are following the Twin Cairns Skills Log Matrix™ (https://twincairns.com/skill-set-matrix/) and will provide training for the following skills:

<table>
<thead>
<tr>
<th>Skill</th>
<th>Skill Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Artifact Curation</td>
<td>Ability to safely register, document and store a wide range of artifact types in curation facilities following state and federal laws</td>
</tr>
<tr>
<td>Artifact Processing</td>
<td>Ability to identify, collect and record a wide range of artifact types, understanding their relative fragility within different site types and conditions</td>
</tr>
<tr>
<td><strong>Artifact Recovery</strong></td>
<td>Ability to record, safely excavate and properly storage artifacts and ecofacts made of different types of materials (ceramics, metal, lithics, etc.) and various level of fragility</td>
</tr>
<tr>
<td><strong>CRM Legislation</strong></td>
<td>Ability to understand and implement relevant CRM legislation at the Federal and State level (including NEPA and Section 106)</td>
</tr>
<tr>
<td><strong>Flotation</strong></td>
<td>Able to use flotation machine to collect flora and fauna</td>
</tr>
<tr>
<td><strong>GIS Software</strong></td>
<td>Can confidently operate Geographical Information Software</td>
</tr>
<tr>
<td><strong>GPS Navigation</strong></td>
<td>Know how to navigate to given coordinates using GPS receiver</td>
</tr>
<tr>
<td><strong>GPS Recording</strong></td>
<td>Ability to record and attribute points, lines, &amp; polygons using a GPS receiver</td>
</tr>
<tr>
<td><strong>Grid &amp; Trench Layout</strong></td>
<td>Ability to lay accurate grid and generate reliable trench outline for excavations</td>
</tr>
<tr>
<td><strong>Large Hand Tools</strong></td>
<td>Can operate a pickax, hoe or similar large hand tool to conduct excavations</td>
</tr>
<tr>
<td><strong>Pedestrian survey</strong></td>
<td>Ability to conduct systematic pedestrian survey over large areas, identify and record artifacts, features and ecofacts</td>
</tr>
<tr>
<td><strong>Photography</strong></td>
<td>Ability to take clear images of various feature, artifact &amp; soil colors at various light and field depth conditions</td>
</tr>
<tr>
<td><strong>Recording Sheets</strong></td>
<td>Ability to understand and properly record excavation process, stratigraphy, sections and artifact documentation</td>
</tr>
<tr>
<td><strong>Section Drawing</strong></td>
<td>Ability to understand concepts of physical and chronological stratigraphy and the method to record those accurately</td>
</tr>
<tr>
<td><strong>Test Excavations</strong></td>
<td>Ability to engage, design and execute a system of test excavations over a site or area to evaluate cultural occupation and its extend -- both spatially and temporary</td>
</tr>
<tr>
<td><strong>Total Station</strong></td>
<td>Able to create maps and plans using a Total Station</td>
</tr>
<tr>
<td><strong>Understanding Stratigraphy</strong></td>
<td>Ability to understand the relationships between layers of both cultural and natural depositions</td>
</tr>
<tr>
<td><strong>Artifact Washing</strong></td>
<td>Ability to wash different artifact types while maintaining their material characteristics for research purposes</td>
</tr>
<tr>
<td><strong>Compliance-NAGPRA</strong></td>
<td>Understand how to comply with the federal Native American Graves Protection and Repatriation Act (NAGPRA)</td>
</tr>
<tr>
<td><strong>Compliance-NHPA/NEPA</strong></td>
<td>Understand how to comply with the federal National Historic Preservation Act (NHPA) and the National Environmental Policy Act (NEPA)</td>
</tr>
<tr>
<td><strong>Compliance-OSHA Health &amp; Safety</strong></td>
<td>Understand how to comply with the Occupational Safety and Health Administration (OSHA) regulations for field work</td>
</tr>
<tr>
<td><strong>Compliance-State Legislation</strong></td>
<td>Understand how to find and comply with individual state legislation, laws and rules concerning cultural and natural heritage</td>
</tr>
<tr>
<td><strong>Consultation</strong></td>
<td>Ability to understand the interests and conduct consultation with all relevant stake holders</td>
</tr>
<tr>
<td><strong>Ground Truthing</strong></td>
<td>Ability to use map and/or GPS to navigate to a geographical location for ground truthing of remote sensing data</td>
</tr>
<tr>
<td><strong>Recording-Excavations</strong></td>
<td>Ability to understand, collect and record all excavation process and data</td>
</tr>
<tr>
<td><strong>Recording-Survey</strong></td>
<td>Ability to understand, collect and record all pedestrian survey data and details</td>
</tr>
<tr>
<td><strong>Shovel Testing</strong></td>
<td>Ability to conduct, interpret and record shovel testing activity</td>
</tr>
</tbody>
</table>
Screening | Ability to use geological and general screens to identify, collect and record small scale finds
---|---
Soil Identification | Ability to identify, describe and record different types of soil and depositions
Understanding Stratigraphy | Ability to understand the relationships between layers of both cultural and natural depositions

### COURSE SCHEDULE

<table>
<thead>
<tr>
<th>Weekly Schedule</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Week 1</strong></td>
</tr>
<tr>
<td><strong>Week 2</strong></td>
</tr>
<tr>
<td><strong>Week 3</strong></td>
</tr>
<tr>
<td><strong>Week 4</strong></td>
</tr>
<tr>
<td>Final Project</td>
</tr>
</tbody>
</table>

### Lecture Schedule — Evenings & Saturdays

- **Geophysics** — Ground-penetrating Radar, Magnetometry, Resistivity, Ground-truthing
- **Remote Sensing** — Aerial Photography, Satellite Imagery, Photogrammetry, LiDAR, Drones
- **Laws & Consultation** — Section 106, State Laws, Permits, NAGPRA
- **Report Writing**
- **Bioarchaeology**
- **Geoarchaeology**
- **Paleoethnobotany**
- **Zooarchaeology**

Course structure may be subject of change upon directors’ discretion.

### TYPICAL WORKDAY

<table>
<thead>
<tr>
<th>Monday-Friday</th>
</tr>
</thead>
<tbody>
<tr>
<td>7:00 am</td>
</tr>
<tr>
<td>8:00 am – 12:30 pm</td>
</tr>
<tr>
<td>12:30 – 1:15 pm</td>
</tr>
<tr>
<td>1:15 – 4:00 pm</td>
</tr>
<tr>
<td>4:00 – 5:00 pm</td>
</tr>
<tr>
<td>5:00 pm</td>
</tr>
<tr>
<td>7:00 – 9:00 pm</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Saturday</th>
</tr>
</thead>
<tbody>
<tr>
<td>7:30 am</td>
</tr>
<tr>
<td>8:30 am – 12:30 pm</td>
</tr>
</tbody>
</table>

In case of rainy days, lectures and lab work will be performed.

### ACADEMIC GRADING MATRIX

Page | 4
Students will be graded based on their work as follows.

**Technical Skill (20%)**: Students should demonstrate mastery of basic field methods (e.g., shovel and trowel technique, measurement accuracy, soil description, data recording) to receive full points for this portion of the grade. This portion of the grade is evaluated through direction observation of students’ execution of field tasks.

**Efficiency (20%)**: Students should show the ability to execute field and laboratory tasks in an efficient manner as they begin to master technical skills. This portion of the grade is evaluated through direction observation of students’ execution of field tasks.

**Interpretation (20%)**: Students should demonstrate that they understand the cultural implications of the sediments excavated, material culture, and their contexts. Evaluation of interpretative ability occurs through students’ completion of field recording forms, which are reviewed for completion and accuracy by all field staff, and then discussed with students to correct any errors or omissions. Upon review by field staff, students will be given the opportunity to improve and/or correct forms as necessary.

**Attitude (20%)**: The overall success of any field project depends upon group effort. Students contribute to a successful field season through cooperation, taking the initiative to ensure work proceeds efficiently, and maintaining a positive attitude. This portion of the grade is evaluated through direction observation of students’ execution of field tasks.

**Project (20%)**: Each student will complete a final project that incorporates skills and information from the program. Students will complete a short report on the site(s) investigated during the program using State of Illinois IHPA forms for reporting archaeological investigations.

Final grades are scaled to individual performance based upon the overall numeric score, individual effort and contributions, and personal improvement over the course of the field school. Final grades are additionally adjusted to overall class performance—no quotas for specific grades are imposed. Grades are assigned using a standard A-F scale.

**SKILLS MATRIX LEVELS**

The school instructors will evaluate the level each student achieved on the list of skills provided above. Each skill will be graded on one of the following three levels:

- **Basic**: Can perform the skill/task with some supervision.
- **Competent**: Can perform the skill/task without any supervision.
- **Advanced**: Can perform the skill/task and teach others how to do it.

**ATTENDANCE POLICY**

The required minimum attendance for the successful completion of the field school is 85% of the course hours. Any significant delay or early departure from an activity will be calculated as an absence from the activity. An acceptable number of absences for a medical or other personal reasons will not be taken into account if the student catches up on the field school study plan through additional readings, homework or tutorials with program staff members.

**PREREQUISITES**

This is a train-to-work program so students must be ready to begin employment at the CRM industry immediately at the conclusion of this program. Students with a BA or BS in archaeology, anthropology or related fields will get a priority enrollment for this field schools.

This is hands-on, experiential learning and students will study on-site how to conduct archaeological field work. Field work involves physical work and exposure to the elements and thus requires a measure of understanding that this will not be the typical university learning environment. You will
have to work outdoors and will get sweaty and tired. Students are required to come equipped with sufficient excitement and adequate understanding that field work requires real, hard work, in the sun and wind. The work requires patience, discipline, and attention to details.

PROGRAM ETIQUETTE
This program will run along many other CAA activities. Students will live in dormitories and will share rooms and bathrooms with other field school students. Living in large groups, accommodating others, and understanding that privacy will not be easily attained must be part this program.

This program takes place in Kampsville, a small, rural community in west-central Illinois that had been the home of the CAA for decades. Our relationship with the town is very important to us and any behavior that jeopardize such good relations will not be tolerated. Inappropriate behavior, including drunkenness, underage drinking, use of illicit drugs, harassment, and violent behavior, are not tolerated and may be grounds for removal from the program. Though legal in the State of Illinois, alcohol, cannabis, and their consumption are not permitted on or in CAA property or at any CAA program site.

EQUIPMENT LIST

General Gear & Supplies
- Linens or sleeping bag, pillow. Beds are provided in the dorms. Beds are twin size.
- Towels
- Lightweight, warm weather clothes
- Warm clothes and a jacket
- Poncho or raincoat
- Laundry bag
- Toiletries
- Hat & sunscreen
- Insect repellent
- Water bottle or canteen
- Small backpack
- Study shoes or boots
- Lightweight summer shoes
- Paper, pencils, pens, notebooks
- Small reading light and/or flashlight
- Medicines/medical supplies
- Laptop computer

Personal Dig Kit
- 4.5-5” pointing trowel (Marshalltown #45-5 or similar). Your trowel should be the single construction variety, not one with handle bolted or welded to the handle. We do not recommend a trowel larger than 5”. Large trowels, for example 6” varieties, are unwieldy. Quality does make a difference. Do not opt for a cheap, poorly constructed tool! Many archaeologists like to have a 5” margin trowel as well (Marshalltown #52 or similar) in their toolkit as well. This trowel should also be a single construction type. Margin trowels are handy, but optional.
- Garden shears
- Metric tape measure, at least 7.5 m long
- 8 oz plumb bob
- Line level. Metal line levels tend to be more durable than plastic ones. It is a good idea to carry a spare line in case yours is accidentally damaged or warped in the field, particularly if you opt for a plastic one.
- 8” bastard mill file
- A roll of carpenter’s string. Braided string is better than twisted.
- Pocket knife
- Work gloves
- Closed-toe work shoes
- Waterproof, fadeproof pens. The CAA’s preferred pen is the Uniball Deluxe micro-point, black ink.
- Pencils and eraser(s)
- A box or bag to put your tools in.
Field Clothes

Field work is often hot, humid, dirty work. It is recommended that you bring light, cool clothes to work in. You will want to bring clothes that you don't mind getting dirty, sweaty and possibly ruining. By the end of the summer, it is not unusual to have a pile of clothes that you won't be wearing again in civilized society. They'll always be good field gear, though. It probably isn’t a good idea to bring your expensive favorite summer outfit unless you don't mind it becoming dirt and sweat stained.

TRAVEL & MEETING POINT/TIME

We suggest you hold purchasing your airline ticket until six (6) weeks prior to departure date. Natural disasters, political changes, weather conditions and a range of other factors may require the cancelation of a program. The CFS typically takes a close look at local conditions 6-7 weeks prior to program beginning and makes a Go/No Go decision by then. Such time frame still allows for the purchase deeply discounted airline tickets while protecting students from potential loss of airline ticket costs if CFS is forced to cancel a program.

Students are expected to arrive at the CAA in Kampsville, IL, on Sunday, first day of your session, by 5 pm to move into the dormitory and attend orientation. Orientation attendance is mandatory.

Students may travel by automobile, airplane, or train.

Travel by Automobile: Kampsville is a very small town. The most convenient directions are found by simply entering “Kampsville, IL” into Google or Apple Maps. Once you arrive in Kampsville, you should check-in at the CAA Museum. Field School staff will be there to greet you and help you to your room.

Travel by Plane: The CAA provides transportation to and from the St. Louis-Lambert International Airport (STL) for field school students. Kampsville is approximately 1.5 hours from the airport. Therefore, there will be one airport run on arrival and departure days.

You should schedule your arrival in St. Louis between 10 am and 4 pm.

We realize some students may have limited choices for arrival times. We strongly recommend earlier arrival times rather than later so that we may arrive at orientation on time. If you absolutely must schedule a flight outside of the requested time range, please us contact us (education@caa-archeology.org) before booking your flight.

We will meet in the baggage area of your terminal. A staff member will be holding a CAA sign. Check-in occurs when you meet our staff at the airport.

Flying students must send to following information about their arrival:

- Airline and Flight #
- Estimated Time of Arrival
- Last Departing City

You should purchase departure tickets for Saturday, the last day of this field school.

Please keep in mind that it takes 1.5 hours to travel from Kampsville to the airport. There is one trip to the airport on Saturday. The earlier your departure time in St. Louis, the earlier we must load vehicles and leave Kampsville. You should also factor in the time necessary to get through airport security (~1 hour). We normally leave Kampsville ~3 hours before the first flight in order to account for travel delays (e.g. weather, traffic, slow ferries). Thus, if the first flight out is at 7:00 AM, we will all leave Kampsville no later than 4:00 am. Please keep this in mind as you plan your flight home.

Travel by Train: Students traveling by Amtrak should arrive at the Alton, IL station. We realize those traveling by train will have fewer arrival and departure options than those traveling by plane. It is
better to arrive early in the day than to arrive in the evening. Please remember: orientation is mandatory (see below).

Those traveling by train must send us the line, number, and arrival time.

We will meet in the common area of your terminal. Check-in occurs when you meet our staff at the station.

**Orientation**

Orientation will be held in Kampsville on the first Sunday of your program at approximately 6 pm. *Attendance is mandatory for all students.*

Course packs and introductory information will be distributed during this short meeting. This will be your first occasion to meet all participants and staff, as well as others in our programs. A light dinner will be provided.

Your travel plans should be scheduled so that you arrive in Kampsville before orientation.

Enrolled students will receive this information and instructions for forwarding their travel plans upon acceptance into the program.

If you missed your connection or your flight is delayed, please call, text or email project director immediately. A local emergency cell phone number will be provided to all enrolled students.

**VISA REQUIREMENTS**

This is a domestic program. No visa is required for US Citizens.

**MEALS & ACCOMMODATION**

CRMFS Students will reside in the CAA’s Kamp Dormitory. The dormitory is coed. No single rooms are available. A refrigerator and microwave area available for student use.

Meals are provided Monday breakfast through Saturday lunch. Cuisine is standard Midwestern dishes. CAA food services accommodates a variety of needs, including vegetarian and vegan diets. Enrolled students will receive a form to report their dietary needs before arrival.

Free, outdoor parking is available to students who choose to drive.

**ACADEMIC CREDITS & TRANSCRIPT (CFS text – do not change)**

Attending students will be awarded 8 semester credit units (equivalent to 12 quarter credit units). Students will receive a letter grade for attending this field school based on the assessment matrix (above). This program provides a minimum of 160 direct instructional hours. Students are encouraged to discuss the transferability of credit units with faculty and the registrar at their home institutions prior to attending this program.

Students will be able to access their transcript through our School of Record – Iowa Wesleyan University. IWU has authorized the National Student Clearinghouse to provide enrollment and degree verification ([https://secure.studentclearinghouse.org/tsorder/schoolwelcome?ficocode=00187100](https://secure.studentclearinghouse.org/tsorder/schoolwelcome?ficocode=00187100)). Upon completion of a program, students will get an email from IWU with a student ID that may be used to retrieve transcripts. The first set of transcripts will be provided at no cost, additional transcripts may require payment. If you have questions about ordering a transcript, contact the IWU office of the registrar at registrar@iw.edu.

**REQUIRED READINGS**

PDF files of all mandatory readings will be provided to enrolled students via a shared Dropbox folder.
Delaney-Rivera, Colleen

Farnsworth, Kenneth B, Thomas E Emerson, and Rebecca Miller Glenn
