

INTENSIVE WORKSHOP FOR TEXTILE CONSERVATION & INTERPRETATION, ISLAND OF ZAKYNTHOS (GREECE)

Course ID: HIS 489

June 2-June 15, 2024

Academic Credits: 4 Semester Credit Units (Equivalent to 6 Quarter Units)

School of Record: Culver Stockton College

This program provides only breakfast during teaching days. Students are responsible for all other meals. There are plenty inexpensive and mid-range local restaurants at Zakynthos that offer a typical three-course Greek meal.

DIRECTORS:

Assoc. Prof. Christos Karydis, Conservator & Assistant Professor at Ionian University, Greece (c.karydis@ionio.gr)

Dr. Angela Pencheva, Co-Founder of Balkan Heritage Foundation, Adjunct Professor at CPCE, New Bulgarian University (Bulgaria) & ICCM Board Member (balkanheritage@gmail.com)

INTRODUCTION

The program provides students with intensive training in ethnographic textile conservation. This program is designed for students who are considering a career in conservation and provides focused, in depth training for the study, conservation, preservation, mounting, and reconstruction of one type of ethnographic artifact – textiles. This is a hands-on program and we will cover both theory and practice of textile conservation.

Students will be guided through the history and technology of ecclesiastical, historical, and ethnographic textiles and consequent stages of their study, conservation, and documentation.

While most textiles are made with organic materials (cotton, wool, flax, etc), some include the use of metal wires (gold, silver, copper, etc). This program will train students to engage with textiles with both organic and inorganic components.

Students will explore the principles of material conservation, including methods and theories. To better understand structure and materials, students will learn how to use analytical instruments, including optical microscopy, X-Ray Fluorescence (XRF) and X-Ray Diffraction (XRD). Students will learn how to operate and interpret results.

During the program, students will work with authentic and replicas of textiles of various types and sizes. This program takes place at the labs of the [Department of the Environment at the Ionian University](#), on the Greek Island of Zakynthos.

IMPORTANT DISCLAIMER

The Center for Field Sciences was established to support field training in a range of sciences at sites across the world. Traveling and conducting field work involves risk. Students interested in participating in any CFS program must weigh the potential risk against the value of education provided for the program sites of their choosing.

Risk is inherent in everything we do and the CFS takes risk seriously. A committee of leading scholars review each field school location prior to approval. Once a program is accepted, the CFS continually monitors conditions at the program site, its academic quality and ability to conduct as safe of an experience as possible.

The CFS does not provide trip or travel cancellation insurance. Students are encouraged to explore such insurance policies on their own. Post Covid 19, most basic policies do not cover trip cancelation due to pandemics. If you wish to purchase an insurance policy that covers such contingencies, explore Cancel for Any Reason (CFAR) plans. [Insuremytrip.com](#), [Squaremouth.com](#) or [Travelguard.com](#) are possible websites where students may explore different insurance policies.

You should be aware that conditions in the field are different than those you experience in your home, dorms, or college town. You will be exposed to the elements, live in rustic accommodation, and expect to engage in physical activity daily.

We do our best to follow the schedule and activities as outlined in this syllabus. Yet local permitting agencies, political, environmental, personal, or weather conditions may force changes. This syllabus, therefore, is only a general commitment. Students should allow flexibility and adaptability as research work is frequently subject to change.

All students must consult medical professionals to ensure they are fit to participate in this program. If you have any medical concerns, please consult your doctor. For all other concerns, please consult with the program director – as appropriate.

COURSE OBJECTIVES

By the end of the workshop the participants will:

- Be able to develop basic practical skills (depending on participant's initial level of qualification) in textiles conservation treatment.
- Become acquainted with the basic methods of required documentation for the conservation of textile using graphic software, as well as photo documentation.

- Learn about the forms, types, traditions, and technology of manufacture of ethnographic textiles in the Eastern Mediterranean, from the Middle Age to the modern era.
- Get acquainted with different case studies for preventive conservation of organic and inorganic textile materials.
- Meet professionals working in the areas of conservation in Greece.

LEARNT SKILLS

We are aware that many students may not seek academic careers but will pursue employment in the private sector. To that end, we are following the Twin Cairns Skills Log Matrix™ (<https://twincairns.com/skills-log-matrix/>) and will provide training for the following skills:

Skill	Skill Definition
Photography	Ability to take clear images of various feature, artifact & soil colors at various light and field depth conditions
Artifact Conservation	Ability to expertly conserve, preserve & restore a broad range of artifact types
Artifact Documentation	Ability to measure, record, photographed and classify various artifact types in the lab
Artifact Processing	Understand how to assign artifacts to accepted cultural/geological spheres, across space (classification) & time (seriation)
Field Conservation	Ability to conduct initial field conservation and preservation of different artifact types, features & architecture
Data Recording	Ability to use printed or digital sheets to document & record field data
Archival Search	Ability to find & search various databases for records related to prior work/research done on cultural or natural heritage in the project area
Public Interpretation	Ability to understand site history and provide clear and coherent interpretation for the public
Report Writing	Ability to write technical reports in coherent language that follow both federal and state regulations and law

SKILLS MATRIX LEVELS

The school instructors will evaluate the level each student achieved on the Twin Cairns Skills Log Matrix™ skills list provided above. Each skill will be graded on one of the following three levels:

Basic: Can perform the skill/task with some supervision.

Competent: Can perform the skill/task without any supervision.

Advanced: Can perform the skill/task and teach others how to do it.

COURSE SCHEDULE

The field school has three parts, each lasting a week: Week 1 – Paper Conservation; Week 2 – Textile Conservation; Week 3 – Metal Conservation.

The last day of the field school is Saturday, June 25.

Date	Activity
June 2	Arrival and check-in by 7:30pm 8:00pm - Welcome dinner
June 3-6	Lectures Lecture 1: Intro to preservation Lecture 2: Introduction to stain removal: exercise (wax, ink stains etc.) Workshops

	Workshop 1: Documentation techniques of textiles (causes of deterioration) Workshop 2: Documentation Workshop 3: Mechanical cleaning and humidification techniques. Workshop 4: Introduction to stitching support Workshop 5, 6, 7: Stitching exercises Workshop 8: Stain removal: exercise (wax, ink, humidity stains etc.).
June 7	Visit to the Ecclesiastical Museum of the Holy Monastery of St. Dionysios.
June 10-13	Lectures Lecture 1: Intro to wet cleaning Workshops Workshop 1: Documentation and preparation before wet cleaning Workshop 2,3: Wet cleaning (1st object & 2nd object) Workshop 4: Finishing with wet cleaning techniques Workshop 5: Stitching exercise Workshop 6, 7, 8: Mounting (board preparation) Workshop 9, 10: Hanger preparation (techniques and materials)
June 14	Visit to the Dionysios Solomos Museum
June 15	Departure. Check-out by 12.30 pm

** Course structure may be subject to change upon directors' discretion.*

TYPICAL WORKDAY

Students will follow this daily schedule during the three weeks of lab work.

7:00am	Wakeup
7:30am	Breakfast and lunch preparation
8:00am	Departure to the lab
9:00am-1:00pm	Lab Work
1:00-2:30pm	Lunch break and free time
2:30-5:30pm	Lab work
7:00pm	Dinner – students on their own

ACADEMIC GRADING MATRIX

Students are required to participate in all components of the field school. Grades are determined as follows:

- Conservation of Textiles
- Written documentation of the Conservation Treatment
- Photo Documentation of the conservation treatment
- Attendance

All the components specified above have equal importance for the calculation of the average grade. The average degree grade will be recorded in the Transcript of Records.

- ❖ **60% - Lab work:** Students will be assessed on the quality of their lab work (i.e., their ability to effectively use conservation methods and instruments to treat cultural artifacts). Students are expected to be able to link the lectures and readings to their laboratory work.
- ❖ **25% - Lab Records, demonstrated diligence and active participation:** Students are required to record their work in a notebook that must be submitted to the project at the end of the field school. The notebook must include scaled sketches, procedures and other notes taken while working on assigned objects.

❖ 15% - Attendance.

ATTENDANCE POLICY

The required minimum attendance for the successful completion of the field school is 95% of the course hours. Any significant delay or early departure from an activity will be calculated as an absence from the activity.

An acceptable number of absences for medical or other personal reasons will not be considered if the student catches up on the field school study plan through additional readings, homework, or tutorials with program staff members.

PREREQUISITES

There are no prerequisites for participation in this field school but note that conservation work requires good manual dexterity skills and ability to carry out delicate bench work. Students will receive hands-on training in conservation work and will spend most of the time learning how to conserve paper, textile, and metals in a lab setting.

Students will be taught how to use a variety of laboratory procedures and equipment – from microscopes to analytical instruments. Conservation work is slow and may be tedious. It requires patience and focus. This is an intensive course so we will cover basic and advanced elements of conservation of organic and inorganic ethnographic textiles.

PROGRAM ETIQUETTE

Greece, a land steeped in myth and history, is a captivating blend of ancient heritage and modern allure. From the birthplace of democracy in Athens to the legendary temples of Olympia and Delphi, Greece is a living museum showcasing the achievements of past civilizations. Its vibrant culture, with its rich traditions, delicious cuisine, and warm hospitality, captivates visitors from around the globe. Whether exploring its archaeological wonders, soaking in the Mediterranean sun, or indulging in its vibrant nightlife, Greece offers an unforgettable experience. Greek people take pride in their heritage and achievements, and we kindly ask for your respect towards their customs, traditions, and culture.

EQUIPMENT LIST

- A pair of comfortable shoes for walking/hiking
- Wide brim hat
- Small backpack (for your water bottle, snacks, camera, etc.)
- Lab coat
- Medication - only prescription medicines you may need. It is not necessary to bring non-prescription medicine from your country since you can buy all basic non-prescription drugs in Greece.
- A converter to EU type electricity wall-plug if needed.
- A good attitude for work, fun, study, and discoveries.

TRAVEL & MEETING POINT

We suggest you hold purchasing your airline ticket until six (6) weeks prior to departure date. Natural disasters, political changes, weather conditions and a range of other factors may require the cancelation of a program. The CFS typically takes a close look at local conditions 6-7 weeks prior to program beginning and makes a Go/No Go decision by then. Such a time frame still allows for the purchase of deeply discounted airline tickets while protecting students from potential loss of airline ticket costs if CFS is forced to cancel a program.

The meeting point is at the lobby of [Hotel Yria](#), the project hotel near historical center of the town of Zakynthos (Zante), at 7:00pm the first day of the program. The Greek Island of Zakynthos (or Zante) is in the Ionian Sea. The island is a popular summer destination for many European tourists. The island is located less than 10 min away from the coast of the Peloponnese. The island has one airport – Zakynthos International Airport (ZTH).

Most visitors to Zakynthos arrive by bus. Buses from Athens to Zakynthos depart from Kifisou station, platform 38 and take about 7 hours. Kifisou station can be easily reached from Athens airport by bus X93 (€5), which takes about 45 minutes and arrives exactly where the bus to Zakynthos is waiting to depart. For bus schedule, see [Ktel Buses](#). There are also many ferries connecting the port of Kyllini (mainland Greece) and Zakynthos. For ferry schedule, see [Levante Ferries](#).

MEALS & ACCOMMODATIONS

Students will stay at the family-run [Yria Hotel](#), located near the historical center of Zakynthos. The rooms are comfortable, with 2-4 beds, bathrooms with shower and WC, TV, 24-hour room service, lockers, hair dryers, LAN plugin connection, A/C and a fridge. Laundry service and free Wi-Fi are available at the hotel. Participants are not expected to bring any additional equipment, linen, or towels. Single rooms are available upon request.

The program covers only the cost of breakfast. **Other meals are not included.** There are plenty inexpensive and mid-range local restaurants that offer a typical three-course Greek meal for 10-20 Euros (equivalent to \$11-22).

Participants should bring clothes and toiletries suitable for warm and sunny weather (26 -36°C), but should also prepare for rainy, windy, and chilly days. Zakynthos offers a lot of opportunities for sports and entertainment. Possible leisure activities during the siesta and days off are swimming, sunbathing, surfing, scuba diving, fishing, and sailing.

Figure 1: The entrance to the Yria Hotel

Figure 2: Entrance to the Department of the Environment at the Ionian University

VISA REQUIREMENTS

There are no special visa requirements for U.S. citizen travelling to Europe, as long as they do not stay

longer than 3 months. Passport's expiration date should exceed the stay by at least 3 months.

Citizens of other countries are asked to check the embassy website page at their home country for specific visa requirements.

PRACTICAL INFORMATION

International dialing code: The Greek international phone code is +30.

Money/Banks/Credit Cards: Greece's currency is the Euro, and there are several banks at Zakynthos. Most shops/supermarkets accept major credit cards (except for American Express, which is not always accepted). However, credit cards are not commonly used for small purchases (for example coffee at a café).

ATM Availability: There are several ATM machines at Zakynthos.

Local Language: The native language is Greek. Given that Zakynthos is a major tourist destination, many locals speak English at least at some level.

Measurement units: degree Celsius (°C), meter (m.), gram (gr.), liter (l)

ACADEMIC CREDITS & TRANSCRIPT

Attending students will be awarded 8 semester credit units (equivalent to 12 quarter credit units). Students will receive a letter grade for attending this field school based on the assessment matrix (above). This program provides a minimum of 160 direct instructional hours. Students are encouraged to discuss the transferability of credit units with faculty and the registrar at their home institutions prior to attending this program.

Students will be able to access their transcript through our School of Record – Culver-Stockton College. C-SC has authorized the National Student Clearinghouse to provide enrollment and degree verification (at <https://tsorder.studentclearinghouse.org/school/select>). Upon completion of a program, students will get an email from C-SC with a student ID that may be used to retrieve transcripts. The first set of transcripts will be provided at no cost, additional transcripts may require payment. If you have questions about ordering a transcript, contact the C-SC office of the registrar at registrar@culver.edu.
