

## FORENSIC ARCHAEOLOGY OF MODERN MASS EXECUTIONS AT CASTELLÒN, SPANISH CIVIL WAR

Course ID: HIS 489

June 2-29, 2024

**Academic Credits: 8 Semester Credit Units (Equivalent to 12 Quarter  
Units)**

**School of Record: Culver Stockton College**

*This program is focused on s of human remains who perished in Castellòn and its surrounding area during the Spanish Civil War and atrocities committed by the Fascist Franco regime, 1936-1956. The program is designed to train students in the process of exhumation, identification and studying human remains from mass burials in conflict zones. Its goal is to train participants in the methodological and legal issues (chain of custody, documentation, etc) that are crucial elements of such work. This program takes place where family & community members are alive and have deep and intensive interest in the identification and research work.*

*This program is emotionally and physically demanding. It requires the utmost respect for the dead and the living, and high emotional resilience to deal with the outcome of extreme violence performed by humans in the past. Students should be aware of the challenges and should attend only if they feel this type of experience is for them.*

*This program DOES NOT offer onsite professional grief counseling.*

### DIRECTOR:

**Dr. Llorenç Alapont Martin**, Prof. Physical and Forensic Anthropology, Universidad Europea Valencia ([llor.alapont@gmail.com](mailto:llor.alapont@gmail.com))

### PROGRAM DESCRIPTION

The Spanish Civil War was fought from 1936 to 1939, between Republican and Nationalist forces. The war began in 1936, when General Francisco Franco began with a coup d'état against the democratically elected Republican Spanish state. Franco wanted to establish a fascist state in Spain and was supported by the then contemporary fascist regimes of Germany and Italy. The Spanish Civil War was seen by many around the world as a struggle between dictatorship and democracy and was internationalised almost immediately. Volunteers from around the world joined combatants of both sides.

Franco's regime was based on intense repression that took many forms. Chief among those was the physical elimination of its enemies. As Franco's Nationalist army took over, executions and mass killings almost immediately ensued.

Castellón began to be directly affected by the Spanish Civil War at the end of March 1938. With the defeat of Republican forces at Teruel, General Aranda – the commander of the Nationalist army – advanced toward Castellón. The town fell to the Nationalist forces on June 14, 1938, and the regime began its 'liquidation' program immediately.

The 'liquidation' of political opponents at Castellón took place in three different phases. From July to October 1938, irregular killings were carried out in the streets and exits of the town, on the roads or in local cemeteries. From November 1938 to February 1939, official files were created for detainees. No judicial process was followed, and immediate death sentences were signed by the military. The third phase was an institutional one. The regime created official War Councils, and a semi-judicial process was followed before death sentences were issued. That phase lasted until 1956. The vast majority of those executed in Castellón and its hinterland were killed during the third phase.

Recent excavations of a mass grave at the cemetery of Castellón, human remains of 51 individuals were exhumed (see images attached). Due to legal protocols and chain-of-custody procedures followed by the Spanish authorities, the remains were transferred to Chelva, the Valencia regional hub for Civil War human remains.

This field school is focused on studying the remains to determine identity, cause of death and other forensic elements so proper documentation could be created and remains may be returned to families and interned in designated graves.

Each student will be responsible for the full recording & study of at least one individual, and more if time permits. This program includes extensive travel to local Civil War sites, including Teruel and Valencia. Students will learn how to contextualize the analysis of human remains with historical events, how to engage with stakeholders and how to study victims of war atrocities and mass burials.

#### **IMPORTANT DISCLAIMER**

The Center for Field Sciences was established to support field training in a range of sciences at sites across the world. Traveling and conducting field work involves risk. Students interested in participating in any CFS program must weigh the potential risk against the value of education provided for the program sites of their choosing.

Risk is inherent in everything we do and the CFS takes risk seriously. A committee of leading scholars review each field school location prior to approval. Once a program is accepted, the CFS continually monitor conditions at the program site, its academic quality and ability to conduct as safe of an experience as possible.

The CFS does not provide trip or travel cancellation insurance. Students are encouraged to explore such insurance policies on their own. Post Covid 19, most basic policies do not cover

trip cancellation due to pandemics. If you wish to purchase an insurance policy that cover such contingencies, explore Cancel for Any Reason (CFAR) plans. [Insuremytrip.com](http://Insuremytrip.com), [Squaremouth.com](http://Squaremouth.com) or [Travelguard.com](http://Travelguard.com) are possible websites where students may explore different insurance policies.

You should be aware that conditions in the field are different than those you experience in your home, dorms or college town. You will be exposed to the elements, live in rustic accommodation, and expect to engage in physical activity daily.

We do our best to follow schedule and activities as outlined in this syllabus. Yet local permitting agencies, political, environmental, personal, or weather conditions may force changes. This syllabus, therefore, is only a general commitment. Students should allow flexibility and adaptability as research work is frequently subject to change.

All students must consult medical professionals to ensure they are fit to participate in this program. If you have any medical concerns, please consult your doctor. For all other concerns, please consult with the program director – as appropriate.

All students must consult medical professionals to ensure they are fit to participate in this program. If you have any medical concerns, please consult your doctor. For all other concerns, please consult with the program director – as appropriate.

## **COURSE OBJECTIVES**

Our program presents a unique opportunity to learn how to properly document and study the victims of war & atrocities through the application of forensic methods and techniques. We will use interdisciplinary approach to identify individuals, diagnose traumatic pathologies resulting in death because of a war and violence. Participants will learn about processes and circumstances of mass burials and conservation (taphonomy) of the human body, methods of registration and exhumation, the interpretation of the circumstances of death, as well as documentation and analysis of associated artifacts.

Our program is designed to train students and professionals. Experience from this program may benefit individuals interested in forensic anthropology, forensic archaeology and bioarchaeology.

While some experience working with human remains will be helpful, beginners are welcome. The first two days of the program will focus on training in ethics, international field and laboratory work protocols in forensic anthropology, human rights and their legal context in conflicts. Each student will be trained in the techniques of forensic anthropology methods.

- Chain of Custody protocols.
- Storage and transportation of human remains.
- Conservation of materials and artefacts found in mass graves.
- Biological profile: human anatomy, age, sex and height estimation
- Forensic pathology: study of injuries, trauma and activity markers in contexts of war.
- Introduction to forensic genetics.

Participants will be provided with a dossier with information on methods, practice, and theory of the forensic archaeology of human remains and physical anthropology.

This field school is aimed to be practical and applied. The four weeks will be dedicated to analysing human remains in the lab. The laboratory work will be complemented with visits to relevant Spanish Civil War sites and lessons focused on field work, exhumation, and post-excavation work.

Each student will be assigned the remains of a single individual, which they will have to document for the entire process. Students will have the guidance, assistance and help of staff members at all times.

A seminar will be held on each Friday afternoon, where we will discuss work done during the week, methods, findings, questions and discussion. Saturdays and Wednesdays are dedicated to excursions to important archaeological and cultural sites in the area. Sundays are rest & recuperating days.

## LEARNT SKILLS

We are aware that many students may not seek academic careers but will pursue employment in the private sector. To that end, we are following the Twin Cairns Skills Log Matrix™

(<https://twincairns.com/skill-set-matrix/>) and will provide training for the following skills:

Skill	Skill Definition
Artifact Curation	Ability to safely register, document and store a wide range of artifact types in curation facilities following state and federal laws
Artifact Documentation	Ability to measure, record, photographed and classify various artifact types in the lab/post ex setting
Artifact Identification	Ability to identify archaeological artifacts and ecofacts, from both pre contact and historical context
Artifact Processing	Understand how to assign artifacts to accepted cultural/geological spheres, across space (classification) & time (seriation)
Basic Conservation & Preservation	Ability to conduct initial field conservation and preservation of different artifact types, features & architecture
Bioarchaeology	Ability to excavate, document & study human remains
Data Recording	Ability to use printed or digital sheets to document & record field data
Photography	Ability to take clear images of various feature, artifact & soil colors at various light and field depth conditions

## COURSE SCHEDULE

Arrival day is Sunday, the first day of the program.

The initial two days of the program will be dedicated to discussions and study of the cultural, methodological and theoretical aspects of the project. Weekly lectures will be held every Wed, prior to dinner. Seminar will be held each Friday afternoon to discuss project progress, theoretical and methodological issues related to work at the site.

Saturdays are dedicated to field trip. The scheduled excursions will include the following:

1. City of Teruel, including frontline trenches and bunkers
2. Belchite, a town marked by the Civil War
3. Albarracín and its Moorish Tower & Castle
4. City of Valencia and Paterna Cemetery
5. City of Valencia and Air raid shelters
6. Valencia and its frontline trenches and bunkers
7. Serrania (Valencia) natural and cultural trip

Sunday is a day off.

The last day of the program is a Saturday. Students should plan to depart any time during that day.

## GENERAL PROGRAM SCHEDULE

<b>Week 1</b>	
Sunday 4:00-6:00pm	Arrival Dinner
Monday 9:00 -5:00pm	Lecture
Tuesday 8:00-5:00pm	Lectures
Wednesday 8:00-5:00pm	Work on human remains
Wednesday 9:00am-8:00pm	Excursion
Thursday 8:00-5:30pm	Work on human remains
Friday 8:00-5:30pm	Work on human remains
Friday 7:00pm-8:00pm	Seminar
Saturday 9:00am-2pm	Excursion
Sat 4:00pm-forward	Free afternoon
Sunday	Free day
<b>Week 2 (Mon-Sat)</b>	
M-F 8:00am-5:00pm	Work on human remains
Friday 7:00pm-8:00pm	Seminar
Saturday 9:00am-2:00pm	Excursions
Sat 4:00pm-forward	Free afternoon
Sunday	Free day
<b>Week 3 (Mon-Sat)</b>	
M-F 8:00am-5:00pm	Work at the lab
Wednesday 9:00am-8:00pm	Excursion/Lectures
Saturday 9:00am-2:00pm	Excursions
Sat 4:00pm-forward	Free afternoon
Sunday	Free day
<b>Week 4 (Mon-Sat)</b>	
M-T 8:00am-5:00pm	Work at the lab
Wednesday 9:00am-8:00pm	Excursion/Lectures
Friday	Lab work wrap up & evaluations
Saturday	Departure

The Director and organizing institutions of the program reserve the right to modify the schedule for scientific needs or for unforeseeable circumstances.

### TYPICAL WORKDAY

6:30am	Wakeup
7:00am	Breakfast
7:30am	Departure to the lab
8:00am	Work begins at the lab/excursion
10:00-10:15am	Morning break
1:30-2:30pm	Lunch
2:30pm	Work on the lab
5:00pm	End of workday
9:00am-8:00pm	Wednesday excursion/Lecture/Friday seminar
8:30pm	Dinner

### ACADEMIC GRADING MATRIX

Students will be graded based on their work as follows.

% of Grade	Activity
------------	----------

50%	Lab work, bones identification, bones photography, Analysis file and data base of human cremations
20%	Lectures/excursions
10%	Friday Seminar
10%	Teamwork, flexibility, adaptability, involvement, initiative.
10%	Interaction with staff and directors, discuss doubts and questions, suggest interpretations.

### SKILLS MATRIX LEVELS

The school instructors will evaluate the level each student achieved on the list of skills provided above. Each skill will be graded on one of the following three levels:

**Basic:** Can perform the skill/task with some supervision.

**Competent:** Can perform the skill/task without any supervision.

**Advanced:** Can perform the skill/task and teach others how to do it.

### ATTENDANCE POLICY

The required minimum attendance for the successful completion of the field school is 90% of the course hours. Any significant delay or early departure from an activity will be calculated as an absence from the activity. An acceptable number of absences for medical or other personal reasons will not be taken into account if the student catches up on the field school study plan through additional readings, homework or tutorials with program staff members.

### PREREQUISITES

None. This is hands-on, experiential learning and students will study on-site how to conduct forensic archaeology research. Forensic work requires patient, respect and understanding of the capacity of humans for extreme violence. It demands discipline and attention to detail.

### PROGRAM ETIQUETTE

Chelva is a town in the *comarca* (an intermediate level of administrative subdivision between municipalities and provinces) of Los Serranos in the Valencian Province. Two rivers flow through Chelva – The Chelva & Turia Rivers. The oldest evidence of human habitation in Chelva is dated to Neolithic times, Chelva was occupied since Neolithic times. Romans built extensively in town, but the origin of modern Chelva is dated to the Moors, who establish the town in the 11<sup>th</sup> century CE.

This project is in its first year, and we plan to continue and work at the site for years to come. Students at this field school represent the project both on and off site. Misbehaviour by any project staff reflect badly on the entire project and may prevent the renewal of research permits.

Students who violate Spanish authorities' forensic work regulations, disrespect Spanish law or culture, or disrespect the dead will be subject for removal from the project. Students are expected to observe and to learn, to enrich themselves with the diversity of cultures and different pace, values and ethics of a small Spanish town.

### EQUIPMENT LIST

The site is permanently covered, so we are not affected by sun or rain.

1. Passport or ID card. All European citizens should bring their health card, or health insurance card, if applicable
2. Student/University ID
3. Mosquito repellent and after-bite cream
4. If you are taking any medication, remember to bring it with you.

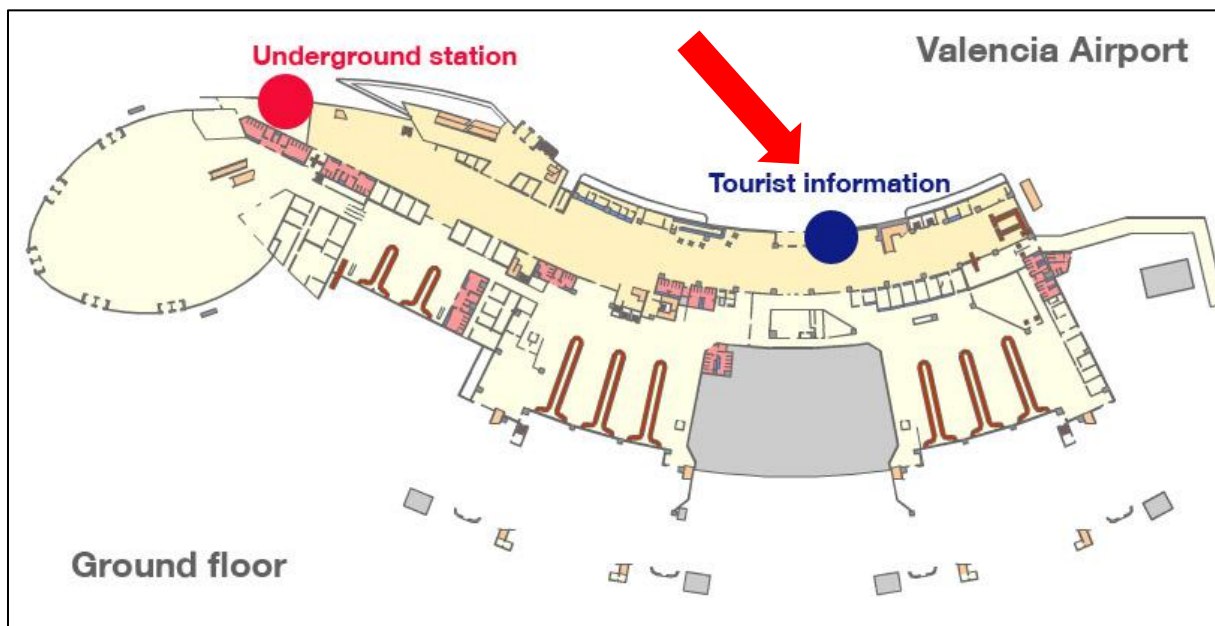

5. Stationery for personal use (notebook, pens etc)
6. Bring your laptop computer as we will be using a digital dossier for the course.
7. Appropriate adaptor for all electronic devices.
8. Consider purchasing an international plan for your phone or purchase a local SIM card when you arrive.
9. We recommend that you wear light and comfortable clothing. You should bring a jacket and/or windbreaker, as well as very comfortable shoes. During excavations, you can wear long or short sleeves shirts, pants or shorts.
10. You don't need to bring any instruments or tools for the excavation. We will provide you with all the tools and instruments you will need for this program.
11. Bring some nice/'dressier' cloths for times when you go out for dinner.
12. Personal First Aid Kit (available in most pharmacies) including. Sterile gauze pads, waterproof bandages, large bandages 8cm x 6cm, Ace bandage 5cm x 4.5m, and medical tape 1.25 x 5m, Eye Wash 20ml, iodine and hydrogen peroxide. Below is an example of a kit available at a pharmacy with most of the supplies: [http://www.boots.com/en/Boots-St-John-Ambulance-Essential-First-Aid-Kit\\_1258543/](http://www.boots.com/en/Boots-St-John-Ambulance-Essential-First-Aid-Kit_1258543/)
13. A small backpack (for your food, bottle of water, wet wipes, camera, papers etc.)
14. Please join us in our efforts to reduce the use of disposable plastics pieces during our program. We kindly ask you to bring your personal meal set – plate, cup, spoon, fork & knife.
15. A good attitude for work, study, and discoveries.

#### TRAVEL & MEETING POINT/TIME

We suggest you hold purchasing your airline ticket until six (6) weeks prior to departure date. Natural disasters, political changes, weather conditions and a range of other factors may require the cancelation of a program. The CFS typically takes a close look at local conditions 6-7 weeks prior to program beginning and makes a Go/No Go decision by then. Such time frame still allows for the purchase of deeply discounted airline tickets while protecting students from potential loss of airline ticket costs if CFS is forced to cancel a program.

We will meet students on Sunday, the first day of the program, at 5:00pm at the Valencia Airport (VLC). Meeting point is by the Tourist Information Booth at the Arrival Hall. Students will then be transported to Chelva by car, a trip of about one hour.

If you missed your connection or your flight is delayed, please call, text or email project director immediately. A local emergency cell phone number will be provided to all enrolled students.

### **VISA REQUIREMENTS**

There are no special visa requirements for U.S. citizen travelling to Europe, as long as they do not stay longer than 3 months. Passport's expiration date should exceed the stay by at least 3 months.

Citizens of other countries are asked to check the Italian embassy website page at their home country for specific visa requirements.

### **MEALS & ACCOMMODATION**

All staff and student will be staying at the 14th century Franciscan Monastery (featured at the film 'The Name of the Rose'). The monastery was transferred to the ownership of the Vizcondal Palace Foundation – a local historical society – and has been remodelled and upgraded to become a functioning hostel. The monastery has large rooms, bathrooms, showers, library, dining room, a fully equipped kitchen, conference room, recreation and outdoor dining area, barbecue area, even a modest swimming pool.

The program provides three meals a day during the week. Students are responsible for their own meals during the weekend. Please note that dinner in Spain is quite late, usually served at 8:30pm.

### **PRACTICAL INFORMATION**

**International dialling code: +34**

**Money/Banks/Credit Cards:** As a major touristic destination, Teruel has a wide availability of banks where you can use your ATM and credit card.

**ATM Availability:** There is a wide availability of banks where you can use a credit card and ATMs

**Local Language:** Spanish is the official language of the Country. English and Spanish are the languages of the program.

**Measure units:** degree Celsius (°C), meter (m.), gram (gr.), liter (l)

### **ACADEMIC CREDITS & TRANSCRIPT**

Attending students will be awarded 8 semester credit units (equivalent to 12 quarter credit units). Students will receive a letter grade for attending this field school based on the assessment matrix (above). This program provides a minimum of 160 direct instructional hours. Students are encouraged to discuss the transferability of credit units with faculty and the registrar at their home institutions prior to attending this program.

Students will be able to access their transcript through our School of Record – Culver-Stockton College. C-SC has authorized the National Student Clearinghouse to provide enrollment and degree verification (at <https://tsorder.studentclearinghouse.org/school/select>). Upon completion of a program, students will get an email from C-SC with a student ID that may be used to retrieve transcripts. The first set of transcripts will be provided at no cost, additional transcripts may require payment. If you have questions about ordering a transcript, contact the C-SC office of the registrar at [registrar@culver.edu](mailto:registrar@culver.edu).

### **REQUIRED READINGS**

PDF files of all mandatory readings will be provided to enrolled students via a shared Dropbox folder.
